### Introduction

The Public Health Outcomes Framework <u>Healthy lives, healthy people: Improving outcomes and supporting transparency</u> sets out a vision for public health, desired outcomes and the indicators that will help us understand how well public health is being improved and protected. The framework concentrates on two high-level outcomes to be achieved across the public health system, and groups further indicators into four 'domains' that cover the full spectrum of public health. The outcomes reflect a focus not only on how long people live, but on how well they live at all stages of life.

This profile currently presents data for the first set of indicators at England and upper tier local authority levels, collated by the public health observatories in England.

The profile allows you to:

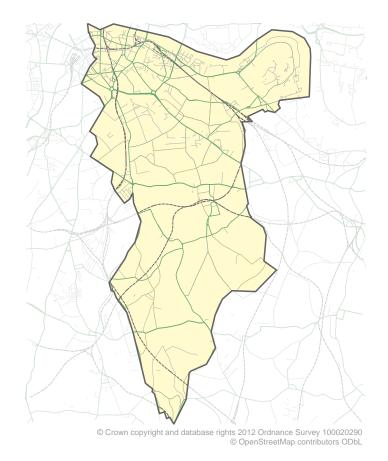

- · Compare your local authority against other authorities in the region
- · Benchmark your local authority against the England average

Public Health Outcomes Framework baseline data will be revised and corrected in accordance with the general DH statistical policy on revisions and corrections.

## Summary Charts

#### Improving the wider determinants of health

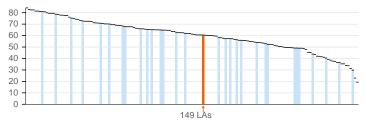

Indicators for tracking progress against wider factors that affect health and wellbeing.

#### 1.01. Children in poverty

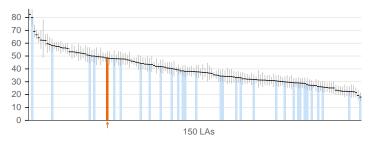

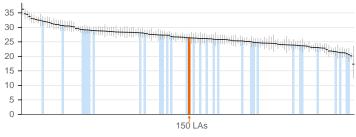

### 1.06i. Adults with learning disabilities who live in stable and appropriate accommodation

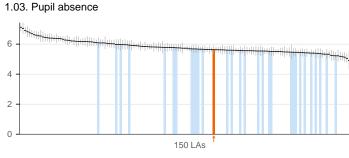

### 1.10. Killed and seriously injured casualties on England's roads

#### 1.13i. Re-offending levels - percentage of offenders who re-offend

10

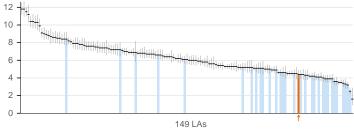

Key

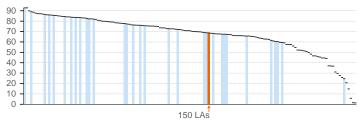

Southwark

Other local authorities in London

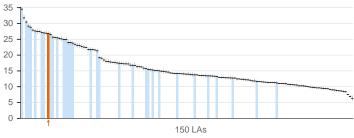

1.05. 16-18 year olds not in education employment or training

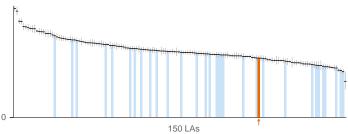

1.06ii. Adults in contact with secondary mental health services who live in stable and appropriate accommodation

1.12ii. Violent crime (including sexual violence) - violence offences

#### 1.13ii. Re-offending levels - average number of re-offences per offender

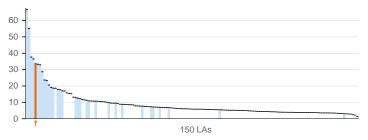

E09000028-00BE Southwark

#### 4.14iii. Hip fractures in people aged 65 and over - aged 80+

4.12ii. Preventable sight loss - glaucoma

4.12iii. Preventable sight loss - diabetic eye disease

120 LAs

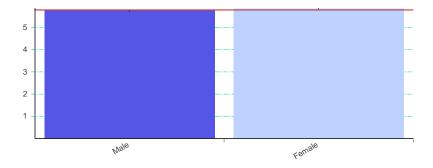

4.14i. Hip fractures in people aged 65 and over

## Inequalities

The Public Health Outcomes Framework focuses the whole system on achieving positive health outcomes for the population and reducing inequalities in health. The majority of indicators in this framework have the potential to impact on inequalities and we aspire to make it possible for all indicators to be disaggregated by equalities characteristics and by socioeconomic analysis wherever possible in order to support work locally to reduce in-area health inequalities where these persist. However, in this first publication, as well as breaking down some of the local authority level indicators by gender or age, we are also presenting data by equalities characteristics for a small number of indicators at national level only. These indicators are presented in this section.

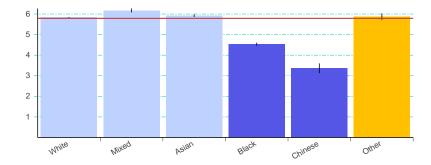

#### 1.03 - Pupil absence - by gender England 2010/11

		Value	LCI	UCI
England	—	5.79	5.78	5.81
Male		5.75	5.72	5.77
Female		5.84	5.82	5.87

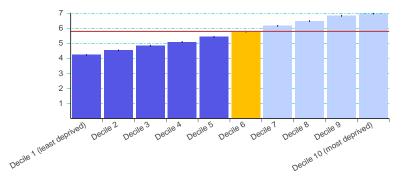

### 1.03 - Pupil absence - by ethnicity England 2010/11

		Value	LCI	UCI
England	—	5.79	5.78	5.81
White		5.84	5.82	5.86
Mixed		6.17	6.08	6.27
Asian		5.92	5.86	5.99
Black		4.54	4.46	4.61
Chinese		3.36	3.13	3.60
Other		5.88	5.72	6.03

### 1.03 - Pupil absence - by deprivation England 2010/11

		Value	LCI	UCI
England	_	5.79	5.78	5.81
Decile 1 (least deprived)		4.23	4.17	4.28
				4.20
Decile 2		4.54	4.48	4.59
Decile 3		4.84	4.78	4.90
Decile 4		5.09	5.03	5.15
Decile 5		5.43	5.37	5.49
Decile 6		5.78	5.72	5.84
Decile 7		6.16	6.10	6.22
Decile 8		6.48	6.42	6.54
Decile 9		6.83	6.77	6.89
Decile 10 (most deprived)		6.98	6.92	7.03

Key: Significantly lower - Similar Significantly higher

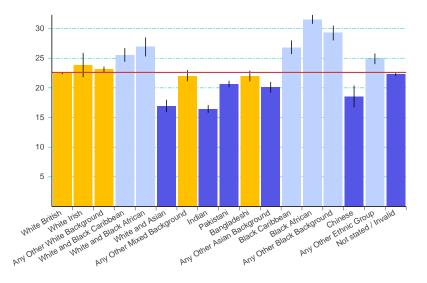

1.06i - Percentage of all adults with learning disabilities who are known to the council, who are recorded as living in their own home or with their family - by gender England 2010/11

		Value	LCI	UCI
England	—	59.00	-	-
Male		58.20	-	-
