Forecasting

These pages provide air pollution forecast information from Defra and the Devolved Administrations. Here you will find daily updated forecasts of UK air pollution concentrations for up to 24 hours ahead. Forecasts are issued for sixteen urban areas and sixteen UK regions; these cover roadside, urban background and rural locations.

Latest UK Air Pollution Forecast

Air pollution is expected to be **Low** at all locations across the UK for the next 24 hours. There is the possibility of ozone increasing to **Moderate** levels (index 4-5) in more rural areas in the south and east of England due to the warmer and sunnier conditions.

The situation is expected to remain unchanged for the following few days.

Forecast valid until 30th August 2012
