

**Subject:** FW: RUB Minutes for TCT

Alan

Detailed below is the agreed minute for this.

7 Commercial and other project matters				
	Item/Description	Decision	Action/Notes	To Action
	<u>Tunnel Cleaning Train</u>			
7.1	David Hughes and Adrian McCrow introduced a paper that provided an update on the replacement Tunnel Cleaning Train (TCT) project.	<b>Noted</b> <b>Noted</b>  <b>Agreed</b>	The paper.  The project has been placed 'on hold' following confirmation that without removal and encapsulation works being undertaken, the presence of asbestos containing materials renders the proposed TCT-inoperable across 98 per cent of the LU network.  For the project to continue to be "on hold" pending seeking authority to enable a feasibility study to be undertaken to understand the volume of asbestos contaminated materials on the network and whether these can be encapsulated or removed so that a decision can then be made on how best to proceed.	

Please let me know if you need anything further.
