Oggetto: Re: AIR group - minutes meeting 7th november

Dear all,

Thank you very much for the minutes.

I already made 150 prints of our final list of participants, (the one [REDACTED] send today).

I think 150 will be ok right? Or do we need more?

Then I just need our latest MoU and final program. Can someone send that to me, so I can make the copies?!

Met vriendelijke groeten,

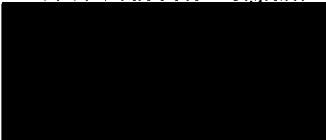

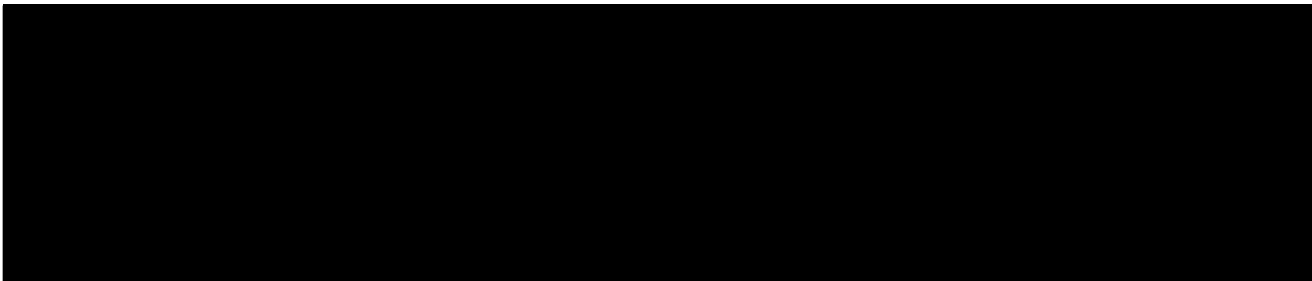

[REDACTED]

Air-Quality Initiative of Regions (AIR)

The European Regions of **Baden-Württemberg, Catalunya, Emilia-Romagna, Greater London, Hessen, Lombardia, North Rhine-Westphalia, Piemonte, Randstad, Steiermark, Veneto and Vlaanderen**

RECOGNIZING THAT:

- Good and clean air is essential to human health;
- The goal of an ambitious air quality policy is to promote clean air;
- Over the past decade air quality has substantially been improved, as a result of regulation at EU level, national efforts and measures at regional level. The EU Air Quality Directive (2008/50/EC, and previous legislation), has been a key policy tool substantially contributing to the improvement of the EU's Air Quality;
- Despite considerable efforts in improving air quality at local and regional level and compliance with most of the targets, there are still problems with some of the standards set by the Directive. This is particularly true for AIR, among the EU's most densely populated, and/or industrialised Regions characterised by special geographic, meteorological and/or structural conditions.

AIR (AIR-QUALITY INITIATIVE OF REGIONS):

The 12 Regions, from 7 Member States:

- Represent 22% of European GDP with €2,791billions € and 18% of European population with 87,6 million people;
- Invest in research, innovation and infrastructure, take regulatory measures, develop best practices and stimulate behavioural changes aiming to improve air quality and reach the EU Directive's limit values;
- Started working together on air quality issues, since the challenges in meeting the Air Quality Directive's limit values within the specified timeframe created the need to open a dialogue among different European Regions.

The purpose of this group is to exchange best practices and to contribute to the Air Quality Directive's revision process.

AIR EMPHASISES THAT:

- The revised Directive shall include a degree of flexibility that allows the specific characteristics of our Regions to be taken into account;
- EU shall recognise regional emission reduction measures;
- EU instruments shall further assist Regions in their efforts to improve air quality;
- The EU shall take source-based measures when tackling air quality problems (e.g. Euro standards, realistic test cycles, tyre and brake wear, buildings, industry, clean fuel);
- It is necessary to promote a better integration between EU policies affecting air quality as well as policies at European, national, regional and local level.

AIR COMMIT TO:

- Share information about best practices, scientific research results, and possibly take collaborative action;
- Work together on a position paper aiming to contribute to the wide European debate which has started on the Air Quality issues;
- Feed the specific regional perspectives in the Air Quality Directive's review by proactively working with all European Institutions involved in the revision process.

Dear [REDACTED]

Yes, as I told you our Minister, Dr. Kurzmann, is very interested in meeting Kulveer Ranger at 16.00. on the 10th November. What location do you suggest? We could even meet in Hotel Renaissance which is very close to the European Parliament, as your politician seems to have a meeting there before as well. Or we could come to your office or meet at our office. Minister Kurzmann will be accompanied by some experts and his head of cabinet.

What do you suggest?

Best wishes

An [REDACTED]

Betreff: drinks on 9/10 Nov

Hiya

Just to update you on our plans for drinks.

The 9 November is not really good as Kulveer is booked to arrive in Brussels on the 10th in the morning. However I still have no info on his return ticket timings. So still possibility to meet up in the afternoon of 10 Nov after 16.00 or something.

I am sorry to be so vague, especially when we initiated this.... I hope you understand the busy schedules of senior officials.

Will keep you posted

thanks

Local and European Scopes to Reduce Emissions from Traffic

The challenge of Air Quality:
a regional perspective
Conference, 10 November 2011

Univ.-Prof. Dr. Stefan Hausberger
Dr. Martin Rexeis
D.I. Raphael Luz
Univ.-Prof. Dr. Peter J. Sturm

CONTENT

- **Introduction**
- **Emissions in type approval and in real world operation**
 - **PM**
 - **NOx and NO₂**
- **What can we do, if fleet renewal is not sufficient?**
(EZ, Retrofit, traffic light coordination, speed limits, In-use tests)
- **Summary and conclusions**

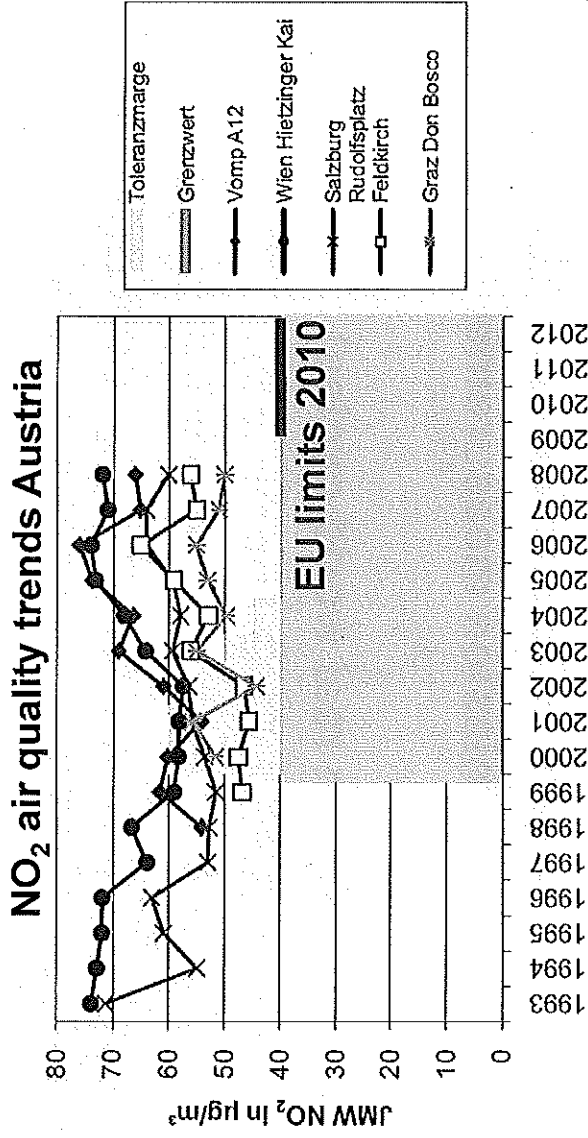

Introduction

The vehicle emissions have been reduced over the last years for most exhaust gas components

Tighter air quality limits gave impulses for lowering the exhaust gas limits for vehicles

Today still air quality limits for PM and NO₂ are exceeded in several regions → presentation deals with NO_x and PM

The air quality targets for PM and NO₂ and the improvements to be expected from vehicle fleet renewal in the near term seem to leave a rather large gap open. → pressure to local measures.

umweltbundesamt[®]

Background from TU Graz on the topic

TU Graz compiles vehicle emission factors (g/km) for the HBEFA V3.1 and for COPERT which are based on emission measurements on

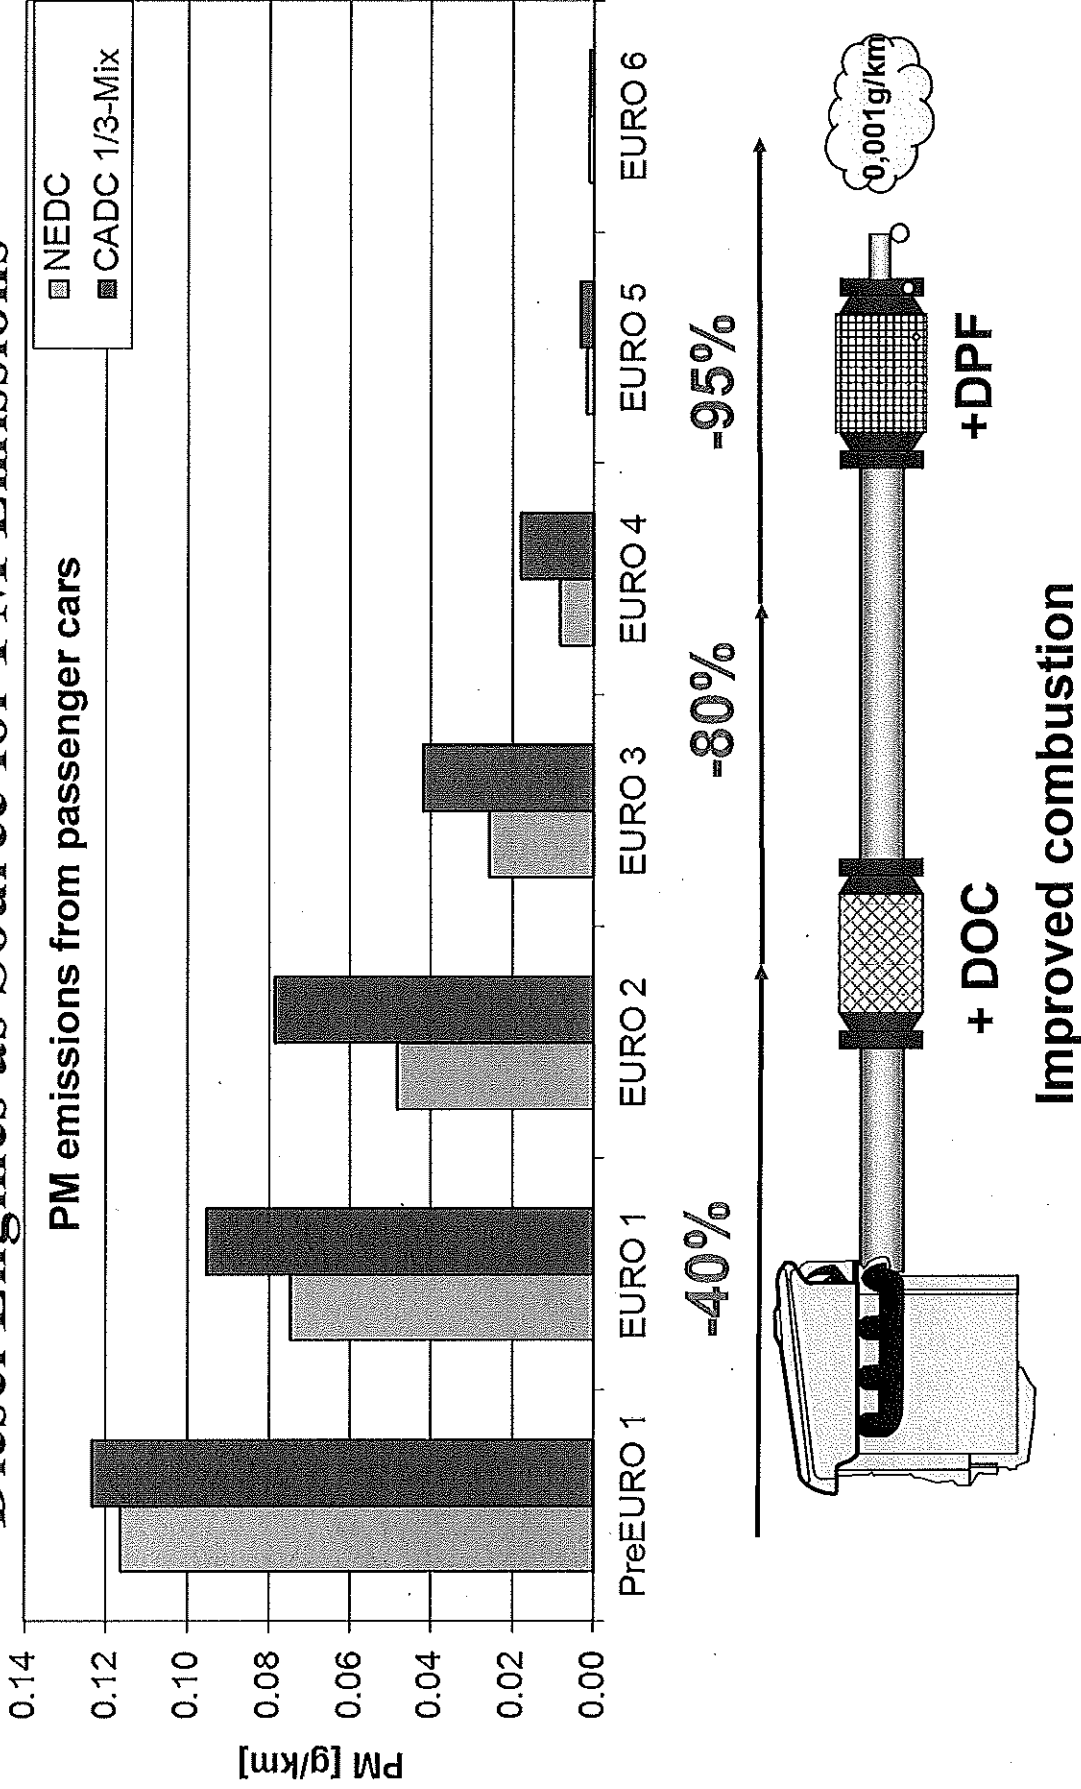

- 118 HDV and HDE
 - 3000 PC and LCV (~1000 tested also in real world cycles) from measurements at TÜV-Nord, EMPA, TUG, Inrets, VTT, TNO,...
- Emission factors are simulated with the Model PHEM from TU Graz. PHEM can be used also to calculate emissions for any local driving situation, as soon as vehicle speed trajectories are available.
→ assessment of effects from speed limits, traffic light control and roundabouts, etc. for several regions in the last years.

TU Graz also calculates the Austrian Emission inventory for the transport sector and evaluates effects of measures on national level.

TU Graz is consultant of the Commission for several type approval test procedure developments.

TU Graz develops engine and drive trains, has air quality monitoring system and simulation tools, etc.

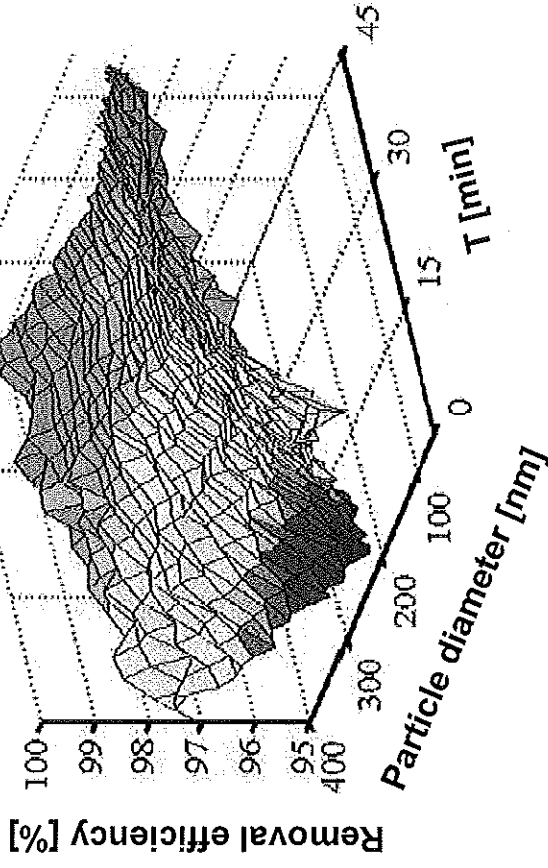

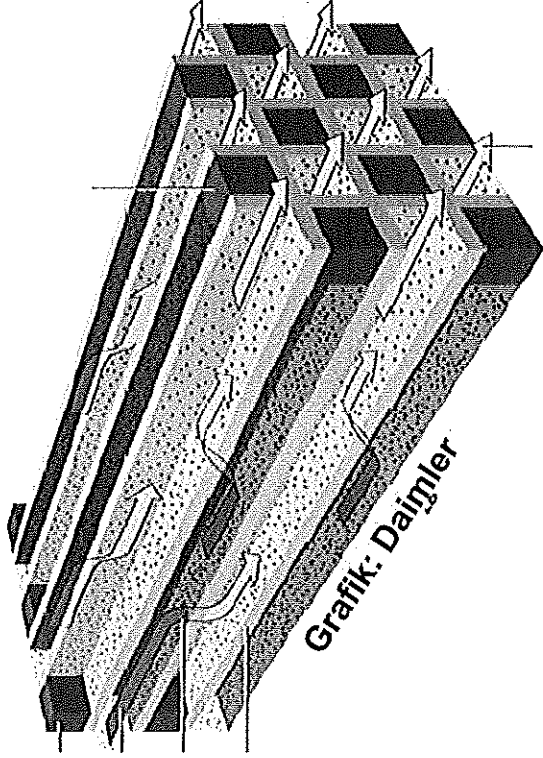

Diesel Engines as Source for PM Emissions

Efficiency from Particle Reduction

Improved combustion for higher fuel efficiency typically also reduces PM

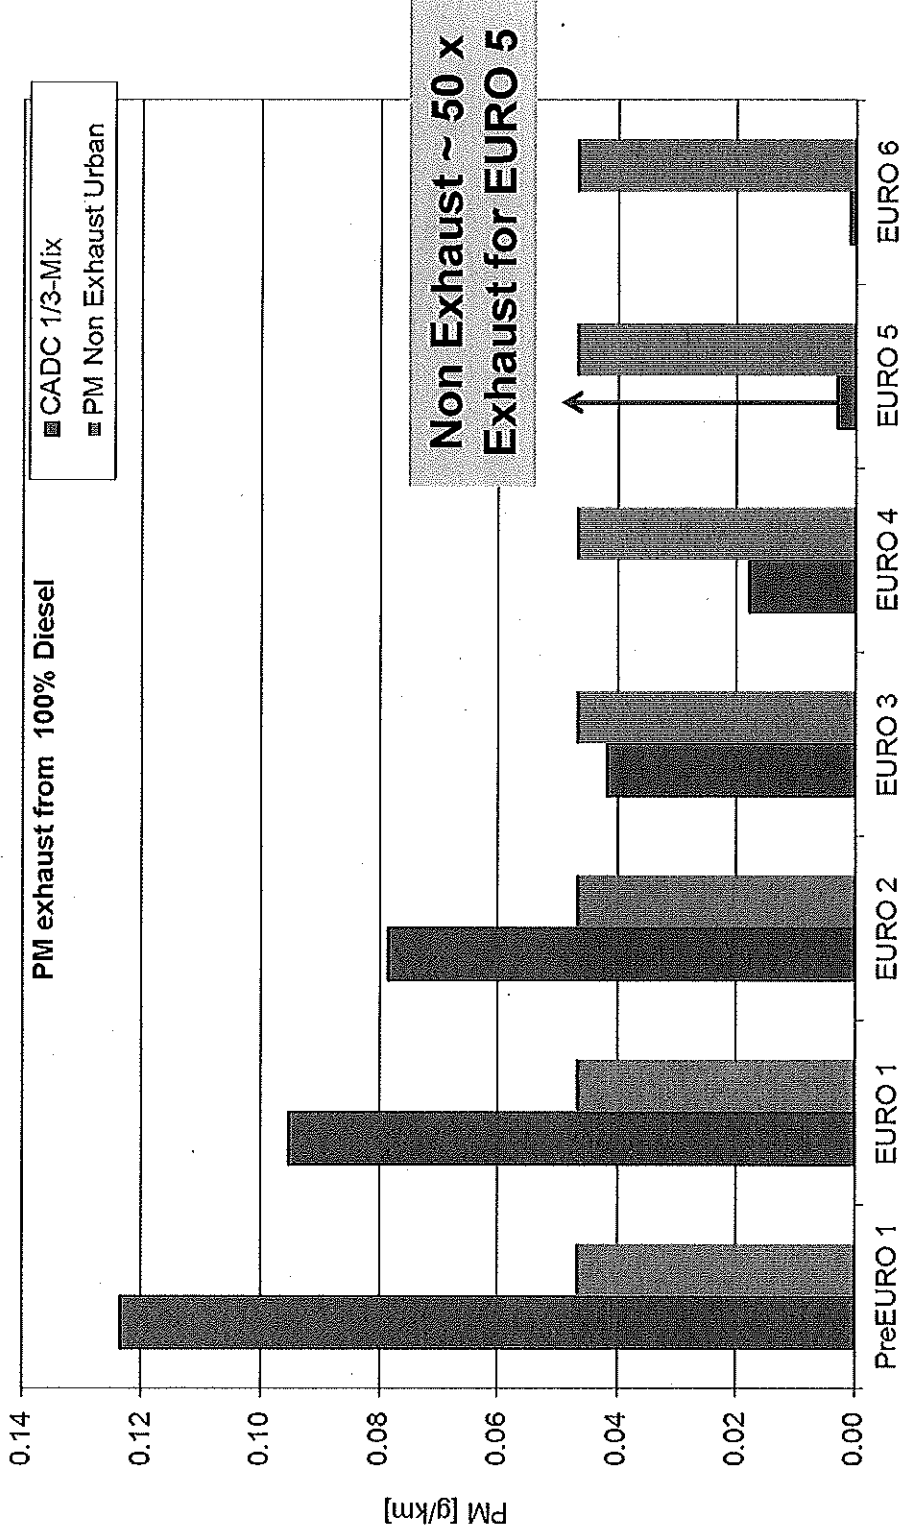

Particle filter is similarly efficient at any engine load. Removal by Impaction and Diffusion → Efficient in all particle size classes

Small particles measured after the filter are typically condensed gas droplets. Health effect compared to conventional PM with soot core?

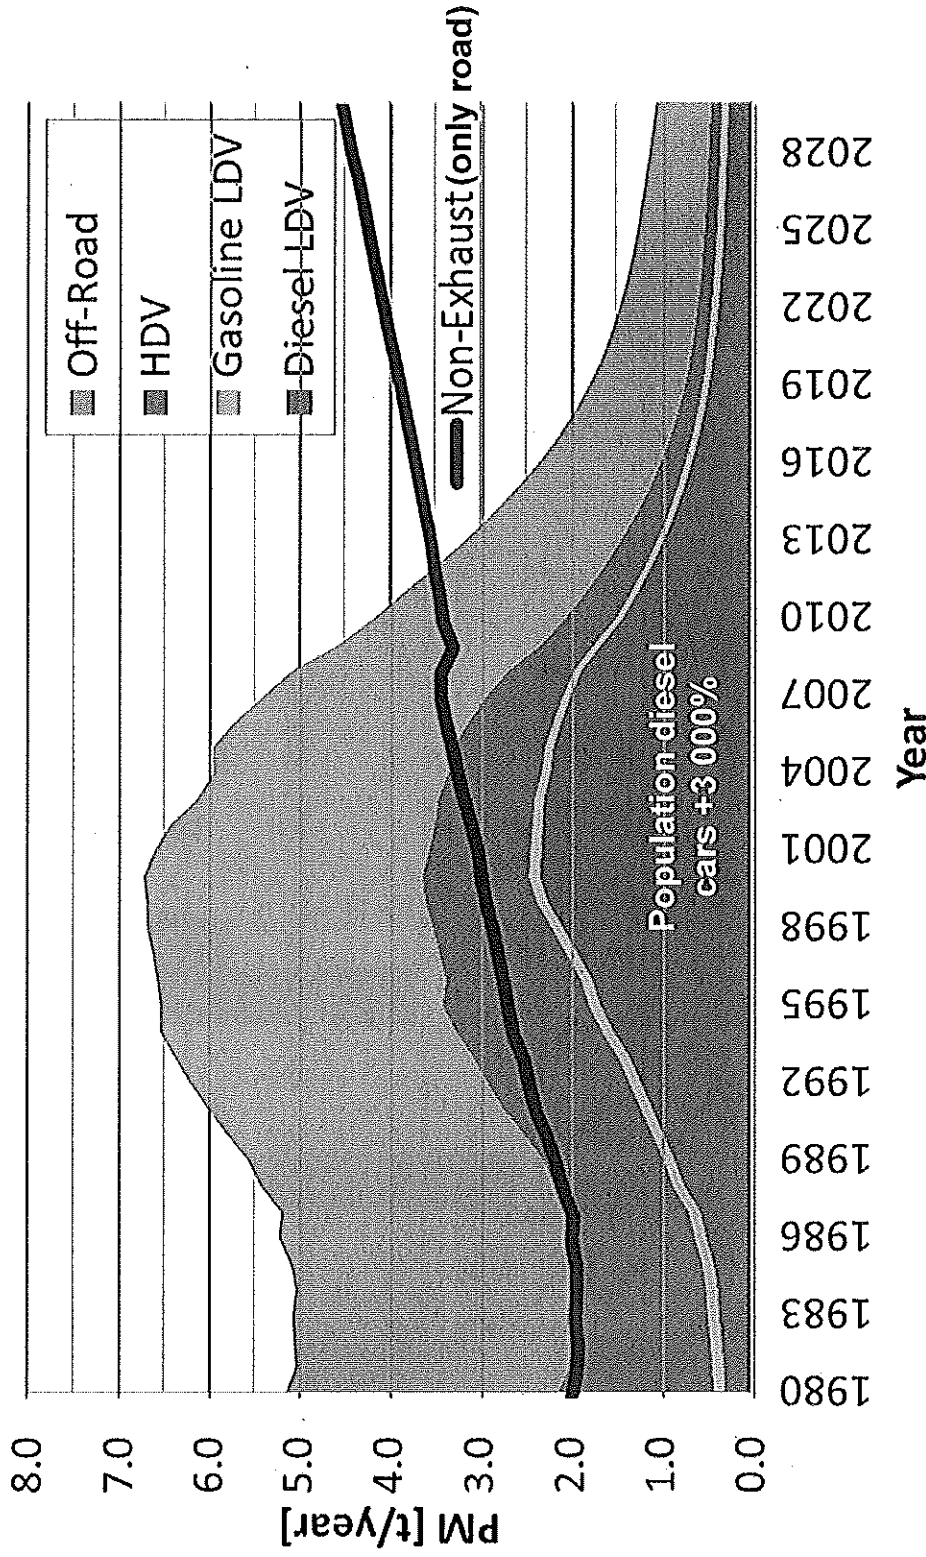

Non Exhaust as Source for PM emissions

Sources are tire- and brake wear and dispersion
 Data base for non exhaust PM emission factors is rather poor

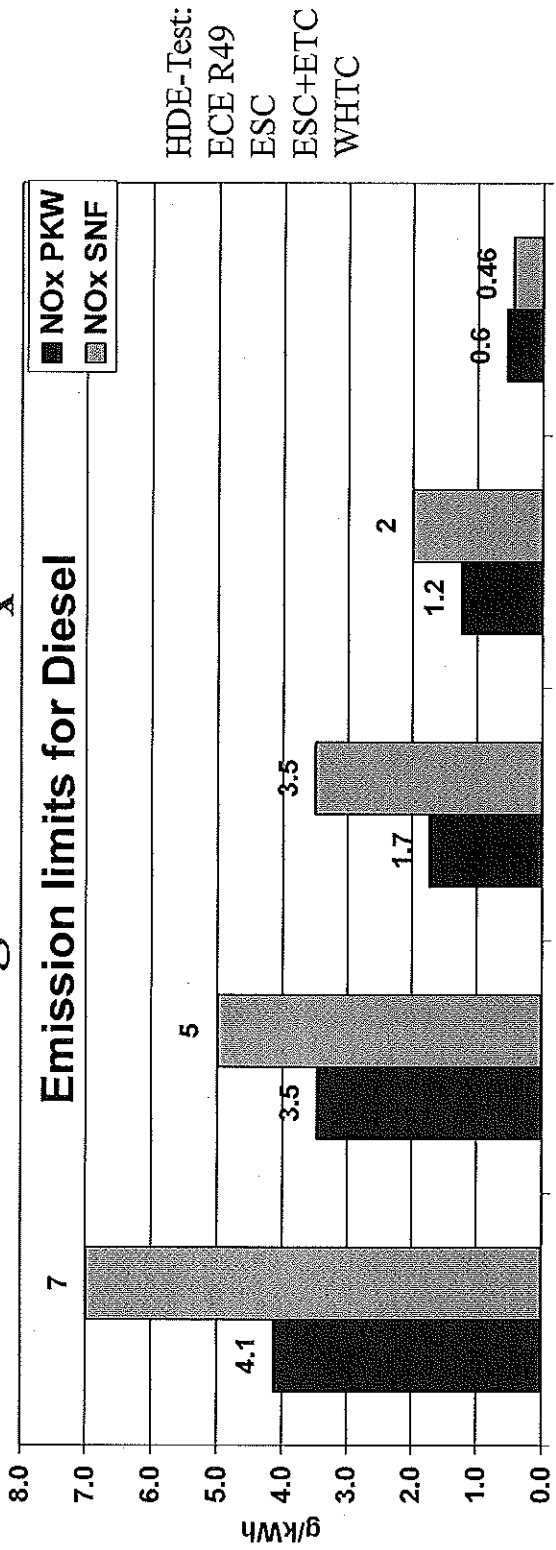

PM Exhaust reduced, non exhaust remains topic

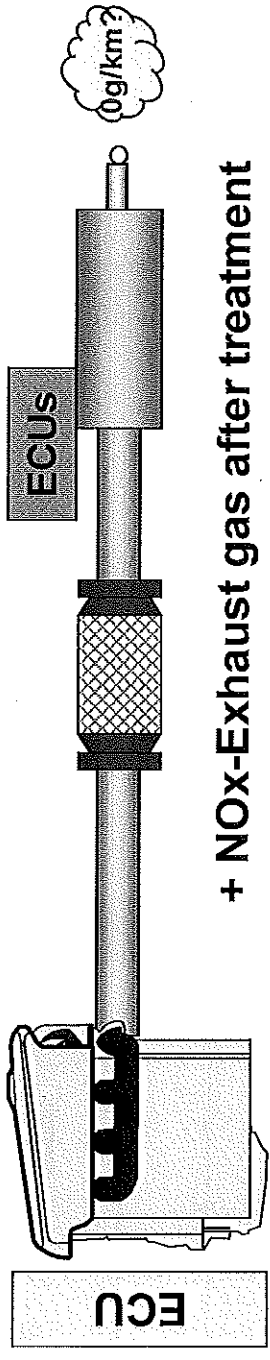

Example: PM emissions from transportation in the Austrian Inventory

Diesel engines as NO_x source

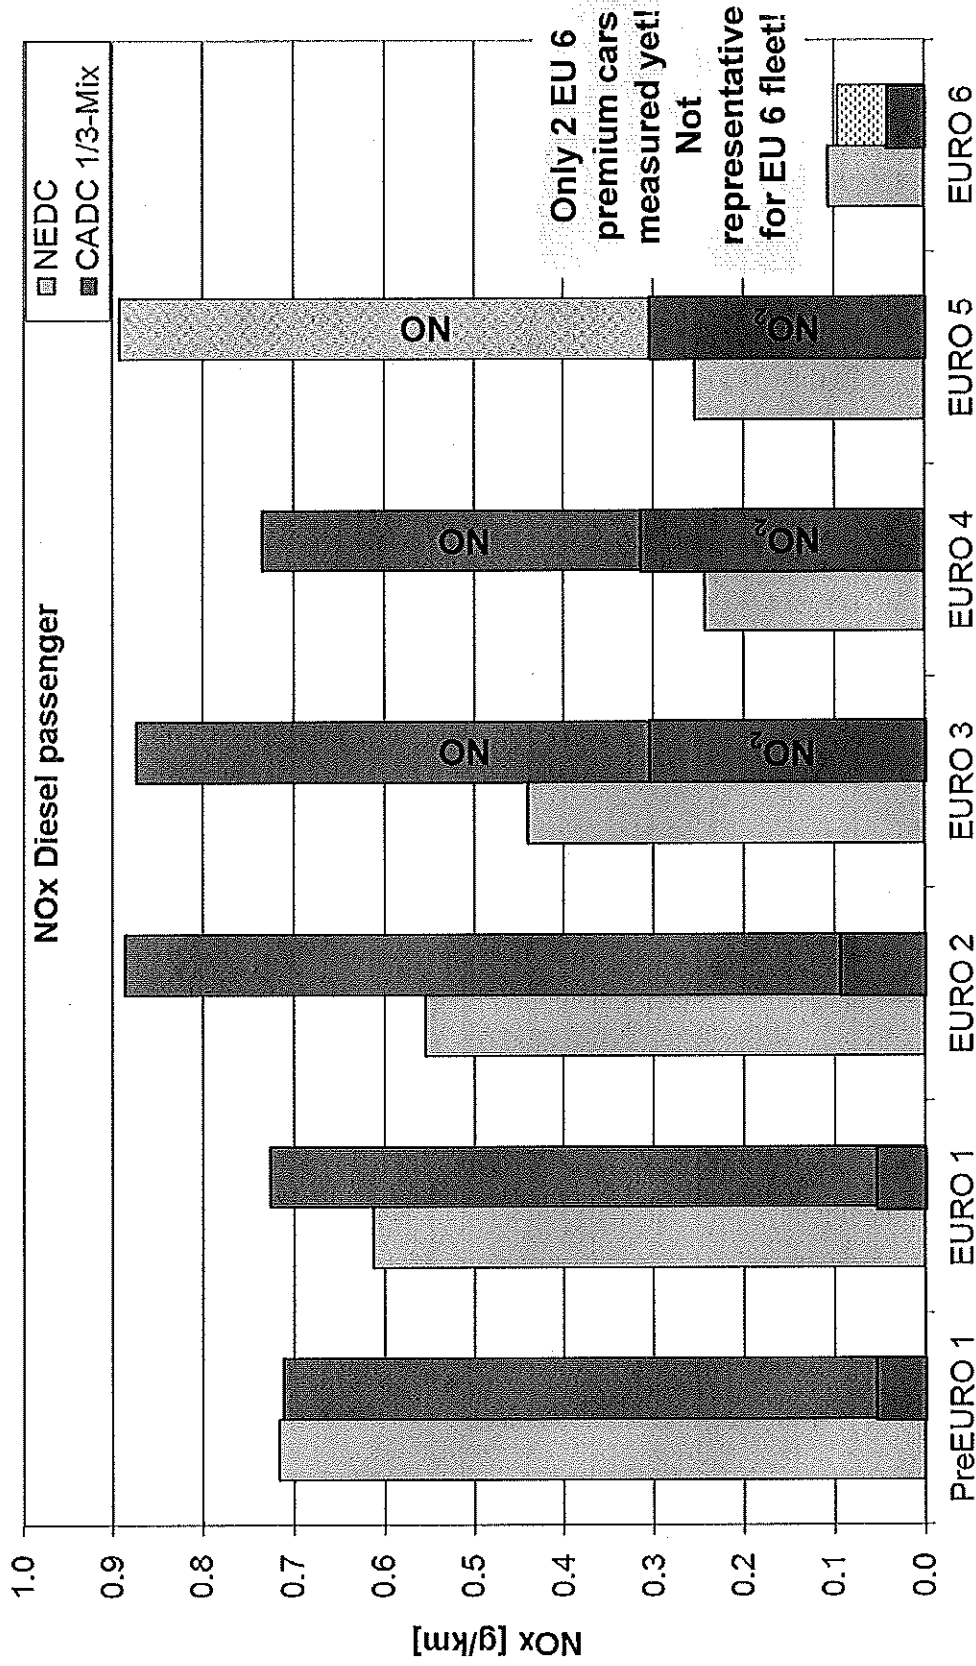

-60% (1996 EU2 to 2000 EU3)
 -40% to -80% (2005 EU4 to 2008 EU5)
 -50 to -80% (2008 EU5 to 2014 EU6)

„Improved“
Combustion

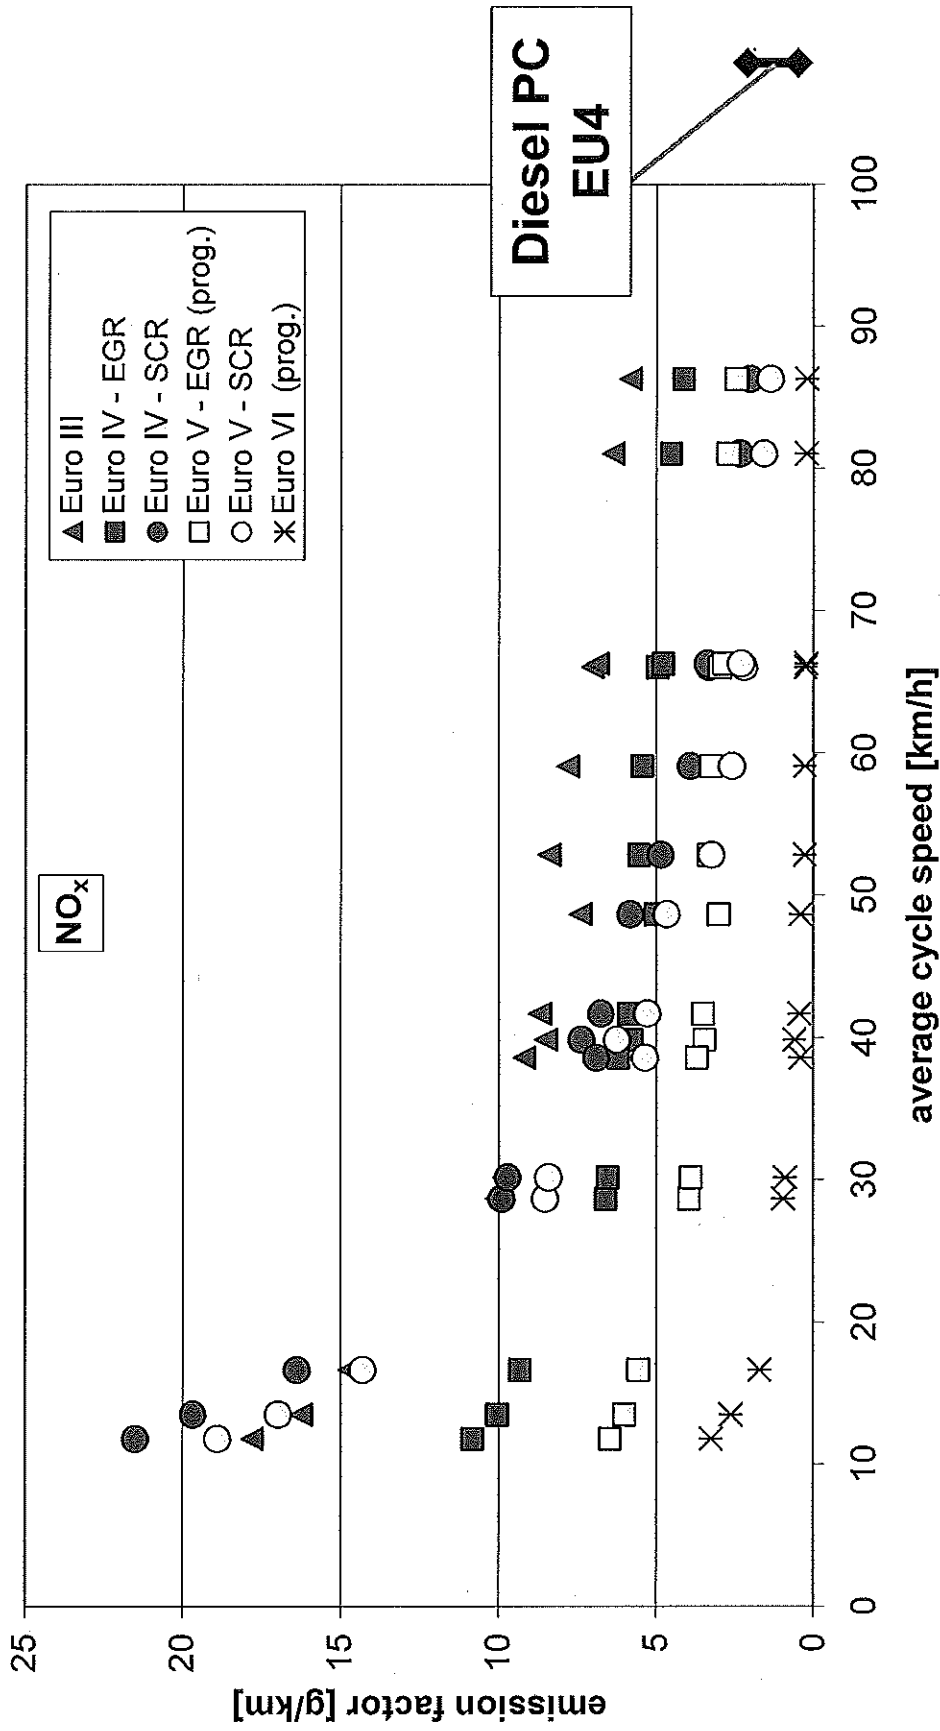

+ NOx-Exhaust gas after treatment
 (HDV from EURO IV on)
 +Optimisation of
the systems

NO_x from Diesel engines in real world operation

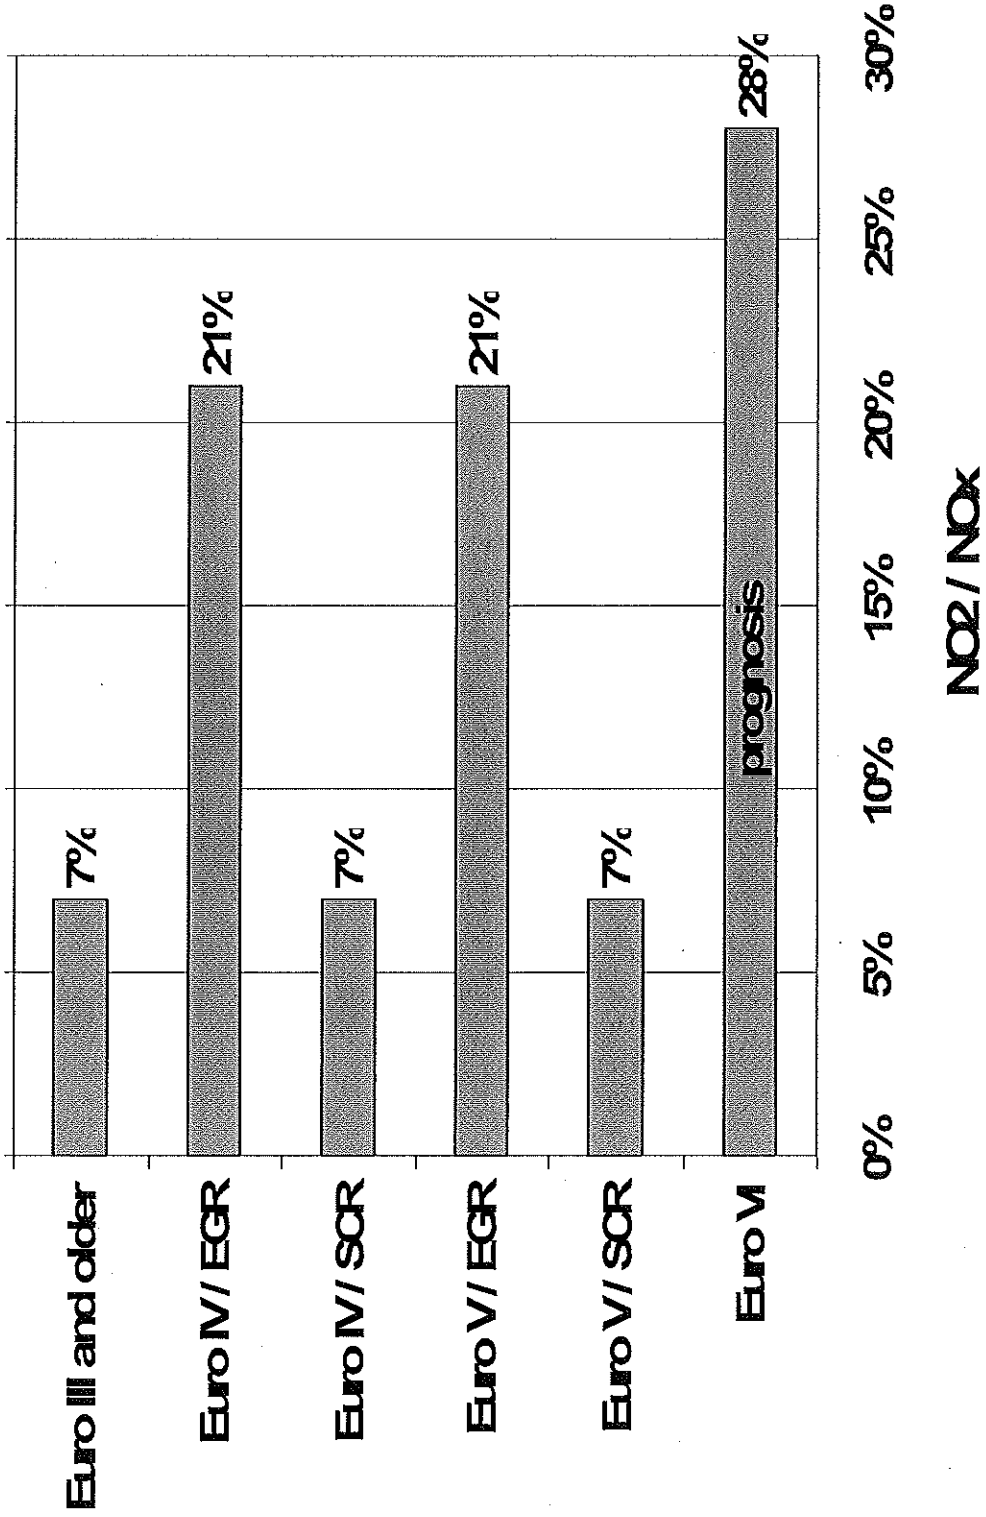

Real World Emissions from HDV

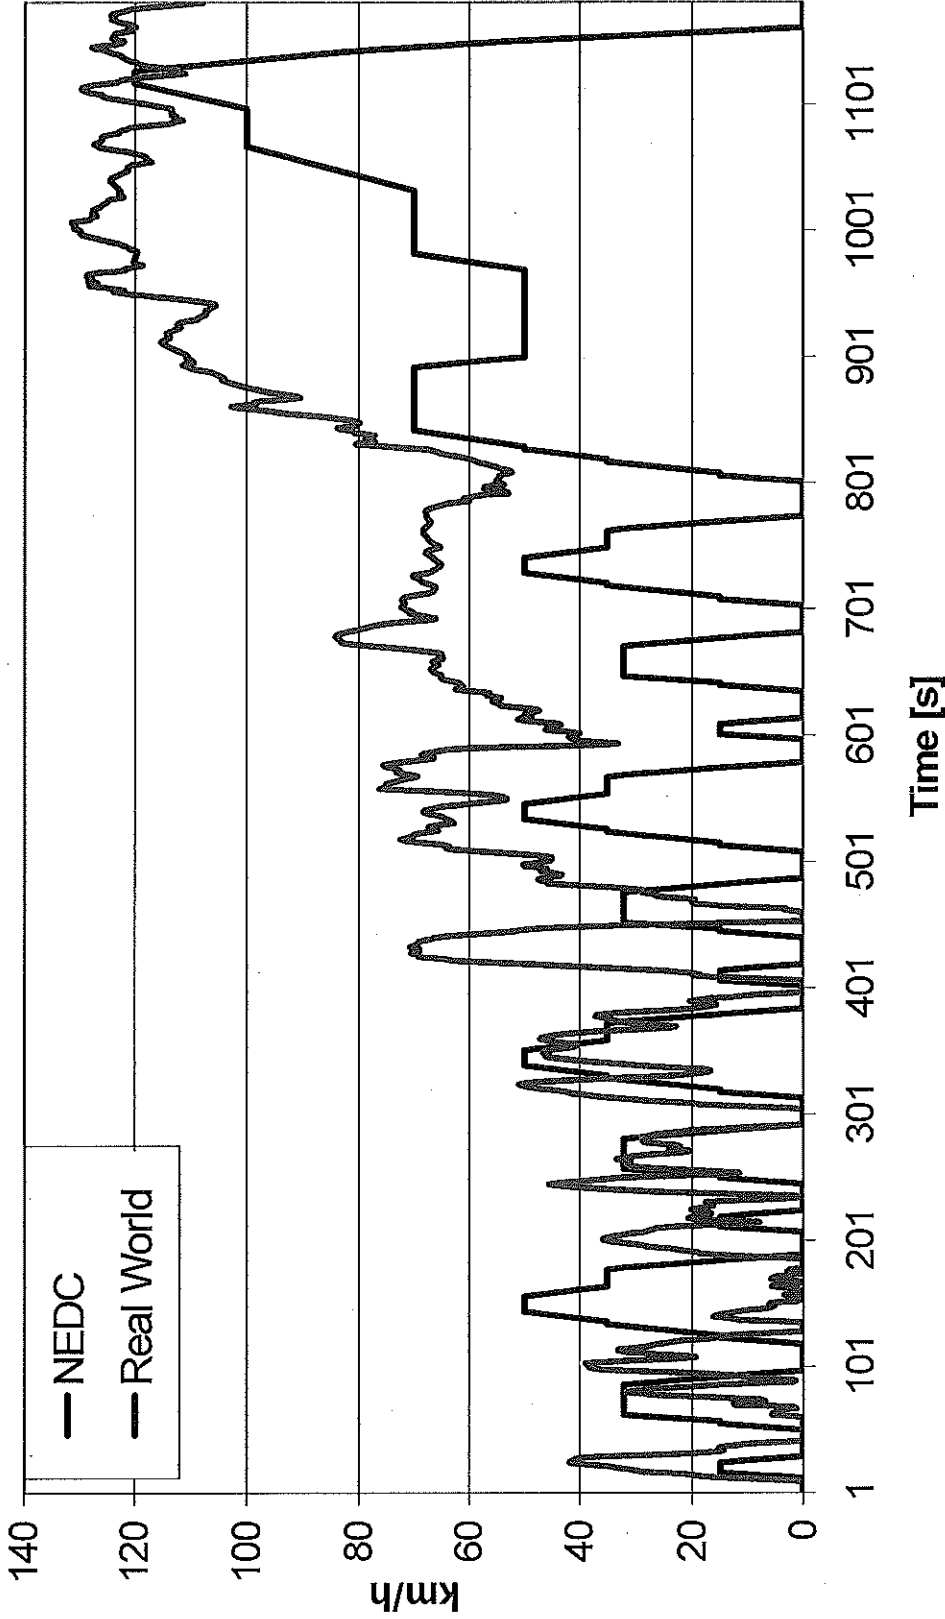

Example: Semitrailer, 40t max. gross vehicle weight, 50% loaded

Shares of NO₂ for HDV

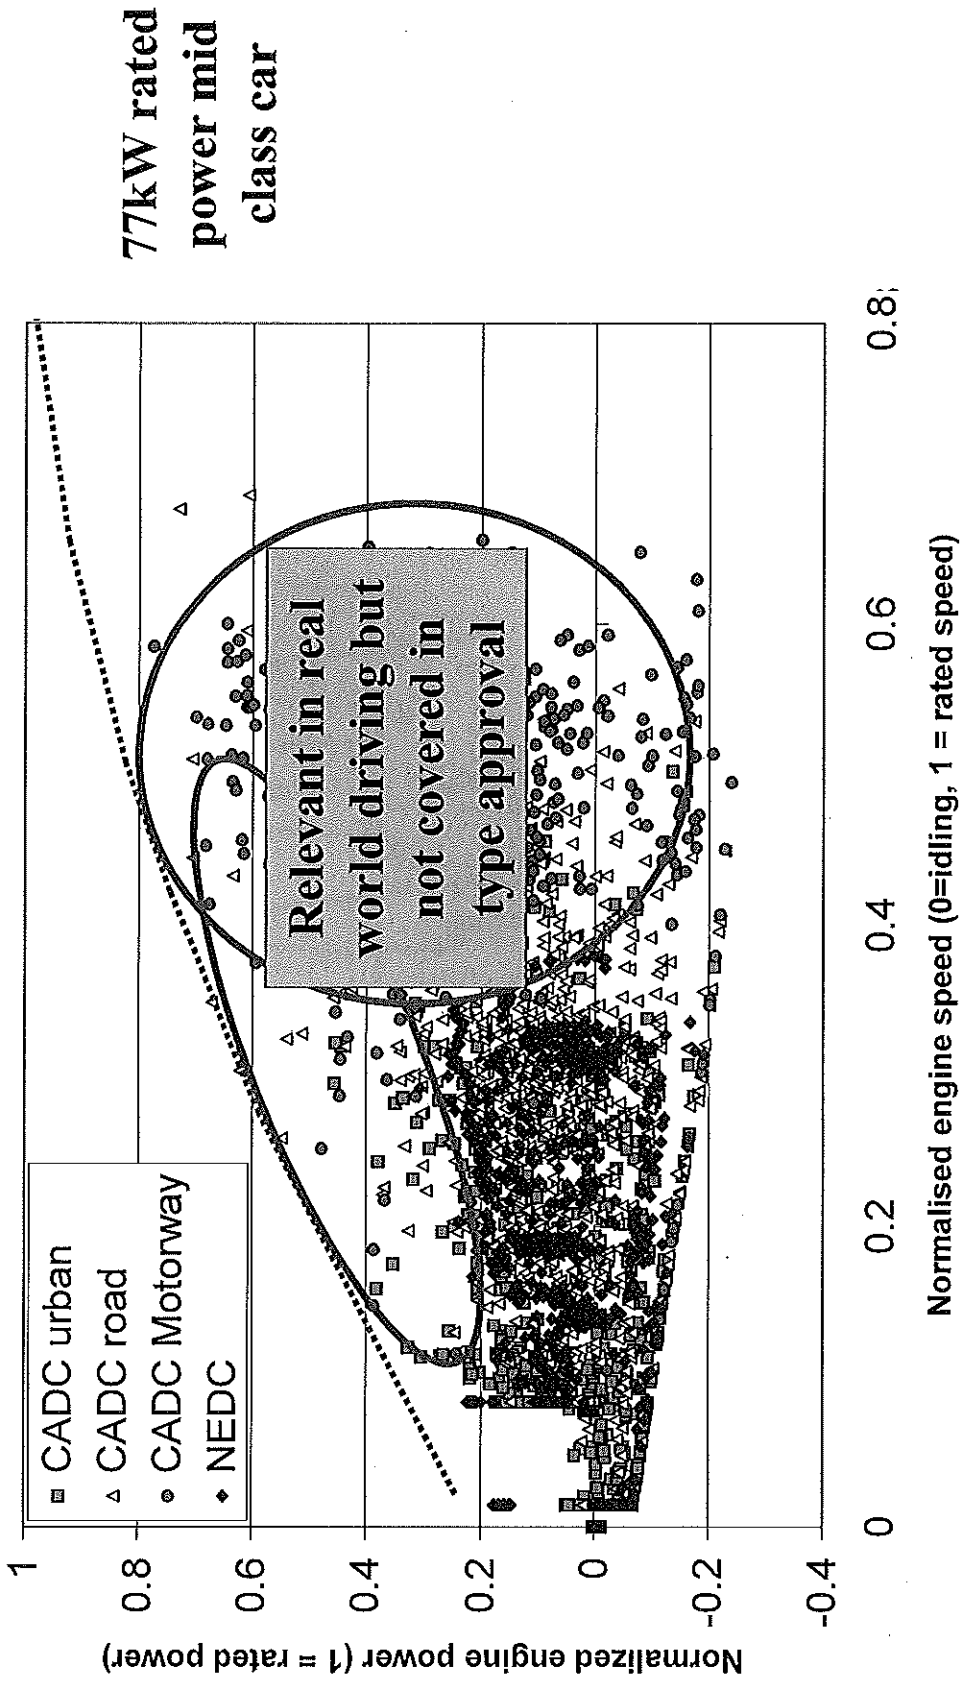

Not perfect type approval test procedures

CADC (Common ARTEMIS Driving Cycle)

Not perfect type approval test procedures

+ different in dynamics, temperatures, etc.: → difficult to create perfect test

Effects of type approval test procedures

Optimised combustion for high fuel efficiency results in high NO_x engine out emissions.

High NO_x conversion from SCR catalyst + high engine-out NO_x emissions results in high Ad-Blue consumption.

→ Trade off between vehicle operation costs and low NO_x

Passenger cars and LCV:

NEDC drives at low load and low dynamics only

→ many real world engine loads are not covered

→ Higher NO_x in most real world driving conditions than in NEDC

Improved test procedure (WLTP) not finalised yet

HDV:

ETC and ESC do not cover low load very well

→ Higher NO_x in real world than in ETC in slow city driving

EURO 6 will be tested in new test procedure (WHTC), situation improved

Options to reduce NO_x and NO_2 emissions (I)

Incentives for early introduction of EURO 6

(check real world emissions of EURO 6 concepts in front)

Limited effect until 2015 due to limited fleet renewal

additional incentives (scrapping bonus, environmental zones,..) can increase the substitution of old vehicles

Could increase share of gasoline vehicles (negative CO_2 effect)

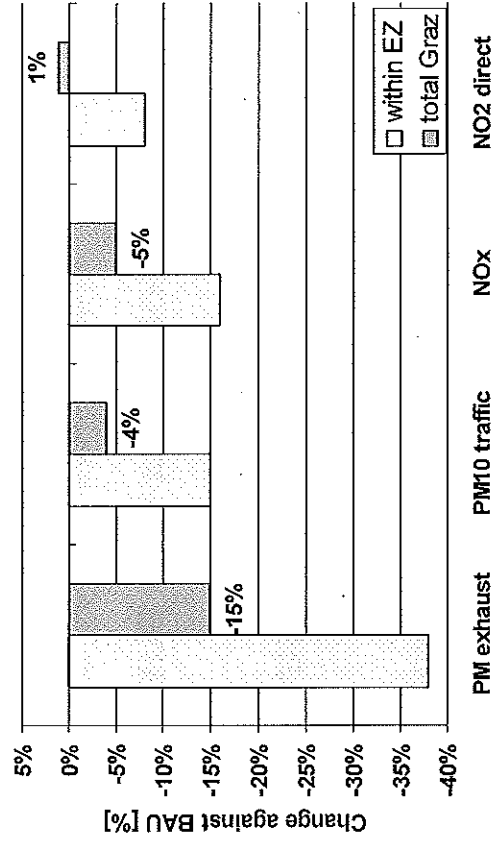

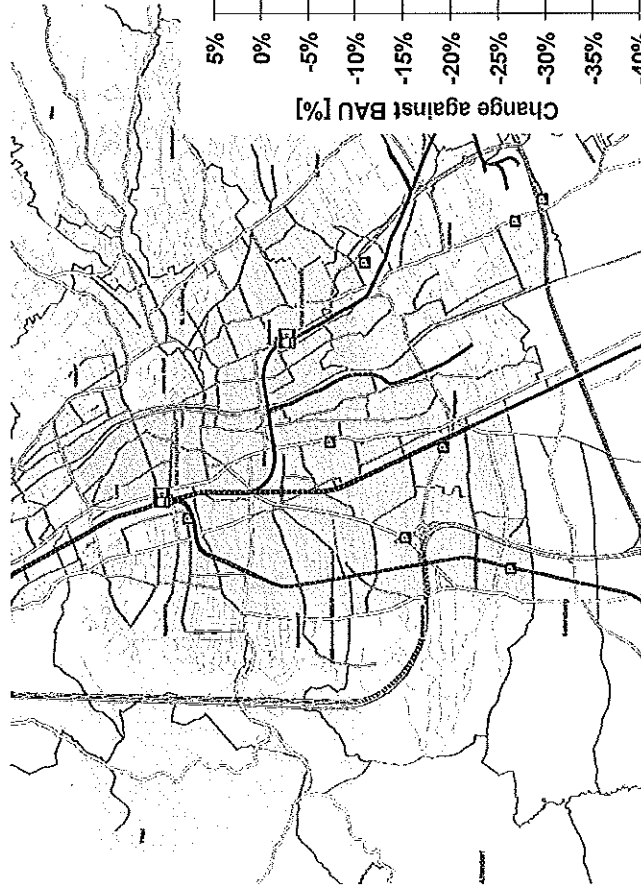

Could increase share of CNG vehicles (similar CO_2/km as diesel, pollutants as gasoline cars and LCV)

Environmental Zones

High emitting vehicles have restricted access to cities.

Main effect is stimulation of fleet renewal. Effect on PM-exhaust depends which EURO-classes are restricted. EURO 3 and older (as shown below) gives remarkable reductions. PM-Non exhaust nearly not affected.

Effect for NO₂ rather small, since EURO 5 diesel cars do not have much lower NO_x than EURO 3

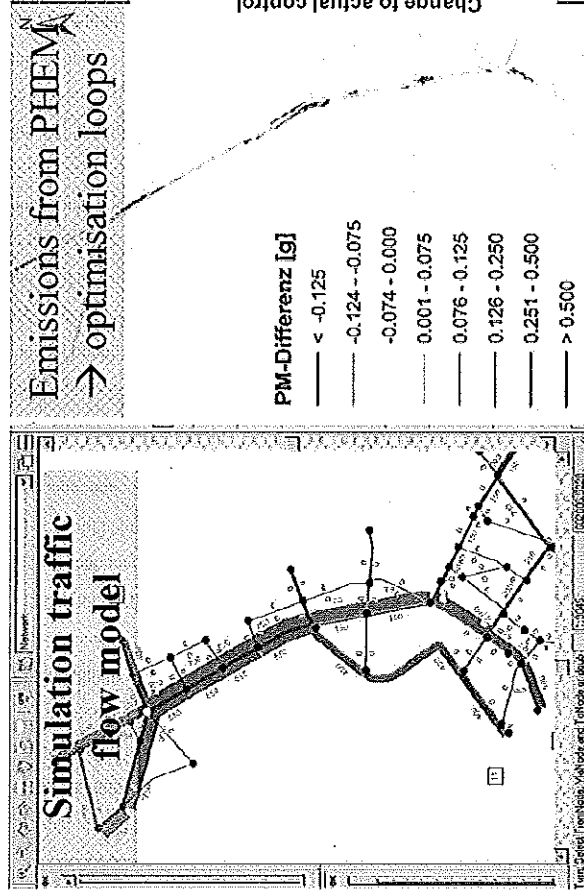

Optimisation of traffic light coordination

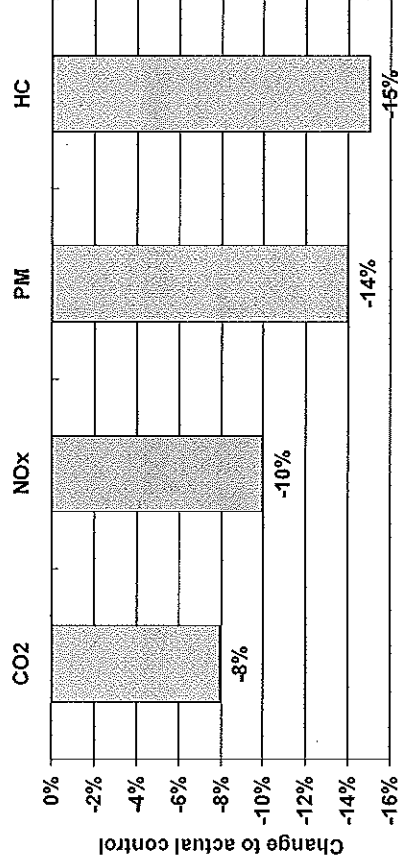

Interaction of traffic lights, traffic, drivers, vehicles and engine technology is very complex.

Models can help the experts to better understand the emission relevant effects of measures

Potential for optimisation for PM, NOx and CO₂ reduction is quite likely in many networks (if not already optimised for emissions)

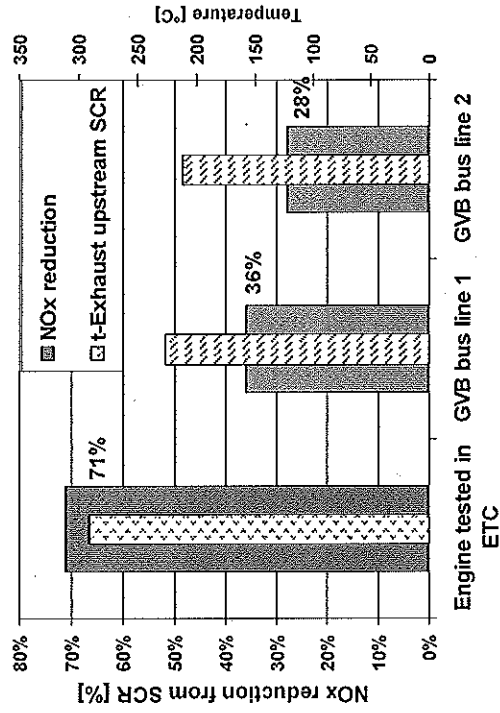

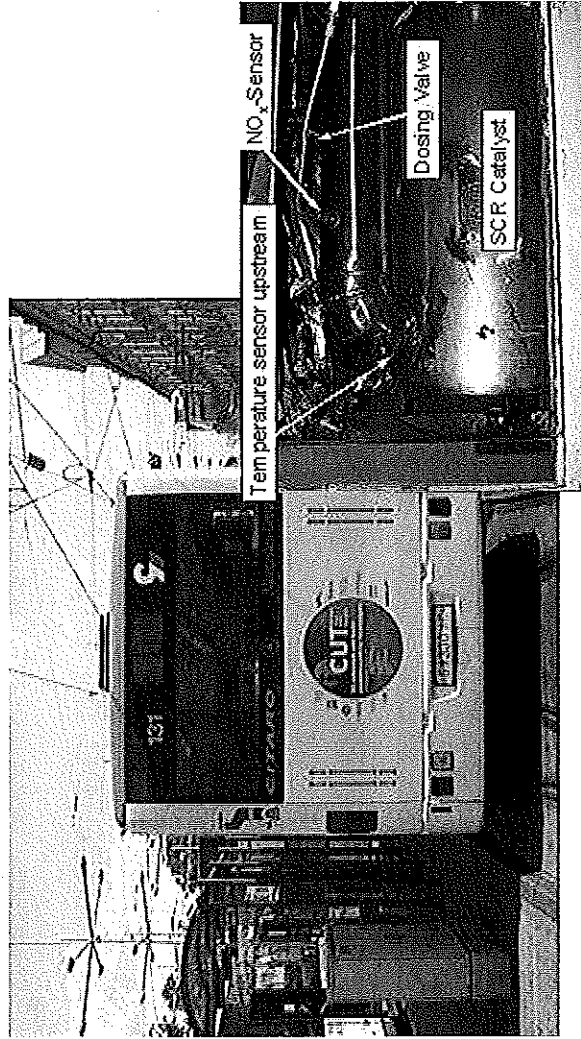

Result for a section in Graz

Retrofit SCR-catalysts

Retrofit systems for HDV reach >80% NOx reduction in the type approval cycle (ETC). ETC is high load cycle with full load pre-conditioning. Exhaust gas temperatures in real world city driving are much lower → SCR efficiency drops (-0% to -50% depending on quality of the system) Retrofit SCR-systems shall be tested also on the vehicle in low load city cycles! ETC result is meaningless!
 SCR-retrofit for cars seem to be much to expensive, for some LCV it could be an option.

In-Use Tests

Modern HDV have a very efficient NO_x after treatment system (SCR) or internal technology (EGR).

Users can tamper these systems (e.g. disconnect EGR or use water instead of AdBlue), what leads to heavily increased NO_x emission levels. Most malfunctions are detected by modern vehicles and are indicated by the OBD system.

With proper instrumentation tampering and driving with relevant malfunctions could be monitored during vehicle inspections.

**For single vehicles this would result in NO_x reductions up to 70%.
How many vehicles are driven with malfunctions and tampering is unknown yet.**

Speed Limits

Very efficient for highways to reduce NO_x and CO₂ emissions.

In urban areas not much potential (e.g. effect of 30 km/h limit depends on % of vehicles driven in 2nd or 3rd gear, driver behaviour, engine technology)

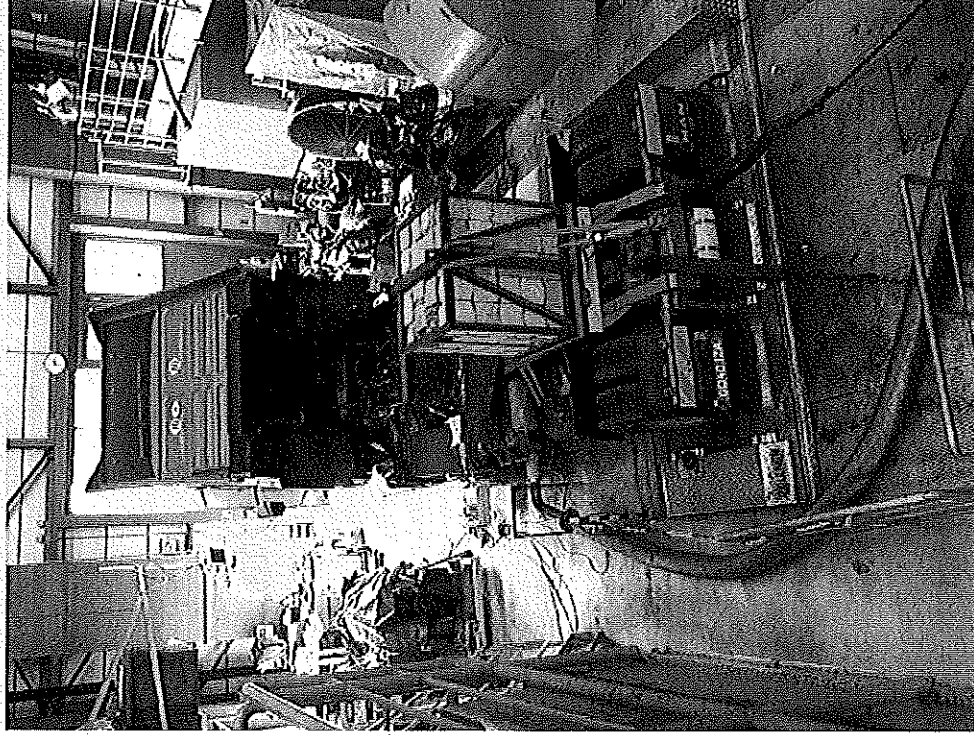

→ no general statement on local trends possible)

**Other commonly discussed measures
not discussed here**

Summary and conclusions

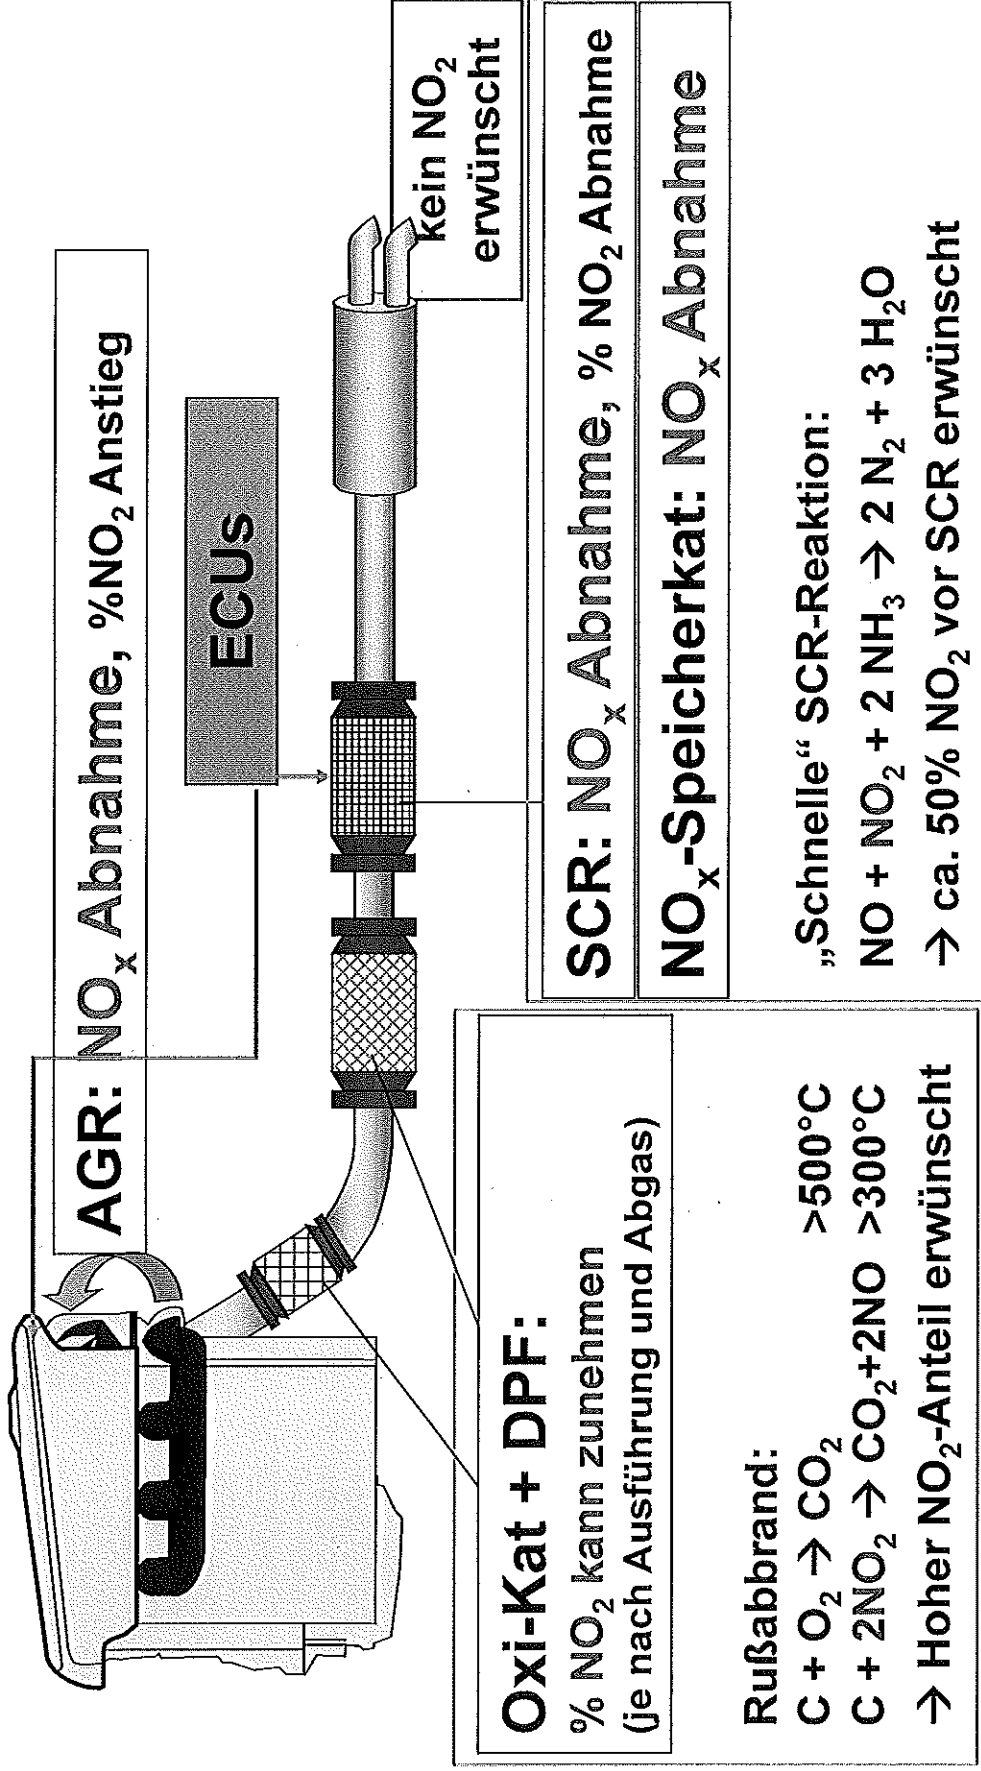

- **NO_x emission from diesel passenger cars did not drop in real world driving a lot since EURO 0 (CO₂, PM, HC, CO did).**
- **Oxidation catalysts and Particle filters increased share of NO₂ on NO_x from <10% before EURO2 to >40% for EURO 4 → NO₂ air quality effects**
- **Specific NO_x emissions from actual diesel cars are 10 x higher than from gasoline cars**
- **PM exhaust emissions drop significantly from LDV and HDV, share of PM-Non Exhaust increases**
- **EURO 6 passenger cars will have low PM but not necessarily low NOx**
- **NOx from EURO V HDV did not drop much in low load cycles. For EURO 6 HDV a better behavior is expected due to new test procedure**
- **Fleet renewal (gasoline, CNG, EURO 6 diesel) will reduce emissions**
- **The potential of alternative measures to reduce NO₂ until 2015 is limited**

Thank you for your attention!

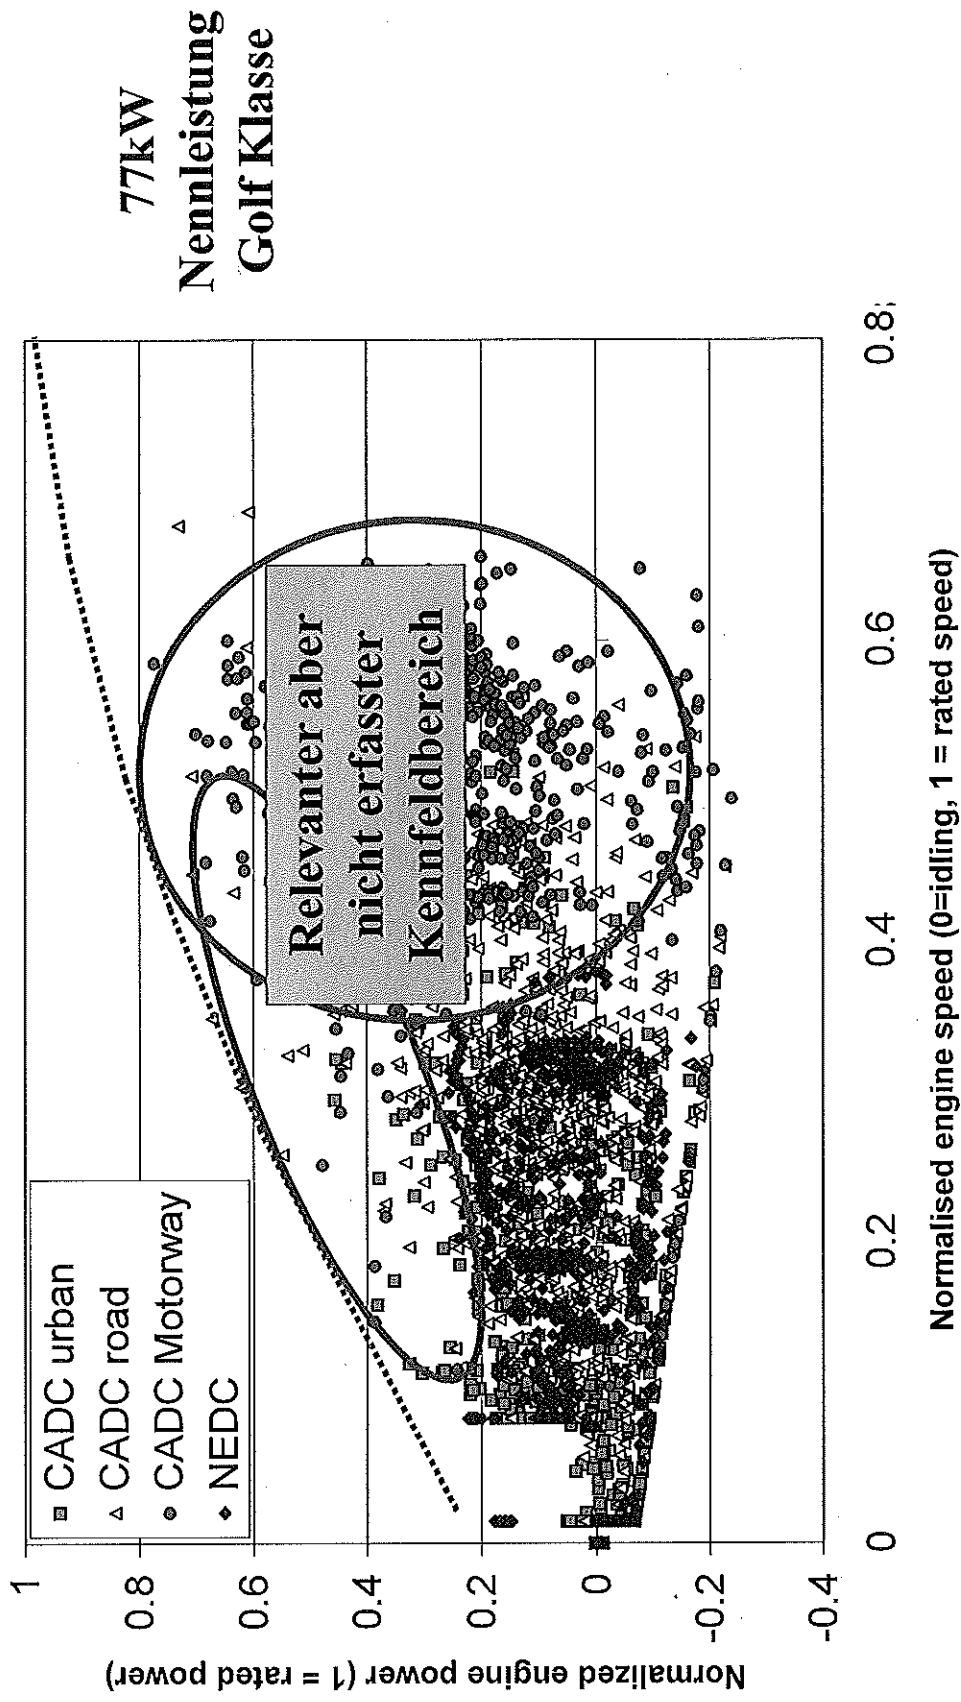

Rollenprüfstand für Schwere Nutzfahrzeuge der TU-Graz

Wie sieht die Zukunft aus? Einflüsse auf NO_x and NO₂ von Dieselfahrzeugen

Motorbelastung im NEDC und CADC

Maurizio Conte

Regional Councillor for Environment

Competences: environment protection plans, soil and air tutelage, integrated water-cycle, soil defence, drainage and woods, mines, mineral and thermal water.

Biography

Maurizio Conte, belonging to the "Lega Nord" (Northern League), is doing now his first experience at the Veneto Regional Council.

He was born in Padua in 1964, he was awarded with an Architecture Degree and works as an architect.

Political career

Mr. Conte has been part of Lega Nord since 1994 and has been Provincial Secretary in Padua starting from 2001 until now.

His administrative career started in 1996, when he became Town Councillor in San Martino di Lupari.

In 2000 he was elected as Regional Councillor for the Province of Padua, and received the biggest amount of votes in the Lega Nord list. In the same year he was appointed as President of the VII Council Commission for Environment and Public Works.

In 2004 he was a candidate for the Presidency of the Province of Padua, and he has been group leader in the Province Council until 2009.

In 2005 he was a candidate for the Regional Council and was the most voted in his own province's list.

In 2010 he was a candidate for the Veneto Regional Council and was elected with over 15000 votes, the best result in the Province of Padua.

[REDACTED]

It is not confirmed yet that Kulveer will be still in Brussels at 16.00 as he might have to travel back earlier than originally planned. So although there is a chance that he will I would like to wait until I have a confirmation from his office before we make any plans.

As we discussed with [REDACTED] whose regional minister is also interested in meeting up, place Luxembourg would be great, but I prefer to have a confirmation first.

Hopefully tomorrow.

Thank you for your patience.

Kind regards

Subject: Meeting

Dear [REDACTED]

Yes, as I told you our Minister, Dr. Kurzmann, is very interested in meeting Kulveer Ranger at 16.00. on the 10th November. What location do you suggest? We could even meet in Hotel Renaissance which is very close to the European Parliament, as your politician seems to have a meeting there before as well. Or we could come to your office or meet at our office. Minister Kurzmann will be accompanied by some experts and his head of cabinet.

What do you suggest?

Best wishes

Betreff: drinks on 9/10 Nov

Hiya

Just to update you on our plans for drinks.

The 9 November is not really good as Kulveer is booked to arrive in Brussels on the 10th in the morning. However I still have no info on his return ticket timings. So still possibility to meet up in the afternoon of 10 Nov after 16.00 or something.

I am sorry to be so vague, especially when we initiated this.... I hope you understand the busy schedules of senior officials.

Will keep you posted

thanks

[REDACTED]
Unfortunately I will have to cancel the drinks on Thursday because Kulveer was asked by the Mayor to be in London earlier so he has now changed his tickets. As you know I was in London on Friday and this is a last minute change to the plans.

However, because there were quite a few politicians that wanted to meet up, we discussed it this morning at the meeting with the AIR Group and decide to arrange for a separate corner where all politicians can have lunch together and maybe with Flakenberg. Folco is making necessary arrangements.

Apologies for this sudden change.

Kind regards

Tema: MEETING politicians

Dear all,

Kulveer Ranger (London's political representative) is coming to Brussels in the afternoon of the 9 and leaving Brussels on the evening of the 10 November.

Kulveer would like to have a separate chat on air quality (and any other environment related issues of interest) with any politicians who will be in Brussels during the same time.

Would your regional politicians be available/wish to meet briefly either for drinks on the 9 (18.30 - 19.30) or 10 November (16.00 - 17.00).

Thank you in advance for a speedy response.

Kind regards

Air-Quality Initiative of Regions (AIR)

The European Regions of **Baden-Württemberg, Catalunya, Emilia-Romagna, Greater London, Hessen, Lombardia, North Rhine-Westphalia, Piemonte, Randstad, Steiermark, Veneto and Vlaanderen**

RECOGNIZING THAT:

- Good and clean air is essential to human health;
- The goal of an ambitious air quality policy is to promote clean air;
- Over the past decade air quality has substantially been improved, as a result of regulation at EU level, national efforts and measures at regional level. The EU Air Quality Directive (2008/50/EC, and previous legislation), has been a key policy tool substantially contributing to the improvement of the EU's Air Quality;
- Despite considerable efforts in improving air quality at local and regional level and compliance with most of the targets, there are still problems with some of the standards set by the Directive. This is particularly true for AIR, among the EU's most densely populated, and/or industrialised Regions characterised by special geographic, meteorological and/or structural conditions.

AIR (AIR-QUALITY INITIATIVE OF REGIONS):

The 12 Regions, from 7 Member States:

- Represent 22% of European GDP with €2,791billions € and 18% of European population with 87,6 million people;
- Invest in research, innovation and infrastructure, take regulatory measures, develop best practices and stimulate behavioural changes aiming to improve air quality and reach the EU Directive's limit values;

- Started working together on air quality issues, since the challenges in meeting the Air Quality Directive's limit values within the specified timeframe created the need to open a dialogue among different European Regions.

The purpose of this group is to exchange best practices and to contribute to the Air Quality Directive's revision process.

AIR EMPHASISES THAT:

- The revised Directive shall include a degree of flexibility that allows the specific characteristics of our Regions to be taken into account;
- EU shall recognise regional emission reduction measures;
- EU instruments shall further assist Regions in their efforts to improve air quality;
- The EU shall take source-based measures when tackling air quality problems (e.g. Euro standards, realistic test cycles, tyre and brake wear, buildings, industry, clean fuel);
- It is necessary to promote a better integration between EU policies affecting air quality as well as policies at European, national, regional and local level.

AIR COMMIT TO:

- Share information about best practices, scientific research results, and possibly take collaborative action;
- Work together on a position paper aiming to contribute to the wide European debate which has started on the Air Quality issues;
- Feed the specific regional perspectives in the Air Quality Directive's review by proactively working with all European Institutions involved in the revision process.

[REDACTED]

Thanks for the good feed back. I am really pleased to see such quick positive effects for our image at DG ENVI!

I also got some very positive feed back from our regional politician, experts and participants.

They all see a lot of potential for future actions for AIR. Therefore we support your suggestion for 2012. Randstad is now finalizing its workplan 2012, where air quality and sustainable living is one of the 4 main priorities.

Our concept 2012 Activities are:

- Making of (AIR) positionpaper.
- Organising Political AIR conference in Brussels.
- Influencing opinion of the Committee of the Regions.
- Briefing crucial EU decisionmakers (EC, MEPs, PV-NL)
- Participating in EU debates and conferences

Date: 11-11-2011 12:42
Subject: next steps, AIR 2012?

Dear AIR-Colleagues,
let me start with a big THANK YOU to all of you for the excellent cooperation in organizing this AIR conference.

I got some very positive feedback from my own Minister, journalists and experts, but even more important from Thomas Verheye who was very impressed by the amount of participants we mobilized as well as by the standard of presentations. DG ENVI originally seemed to think we were just a group of regions who wanted to water down the directive but now they realized that we are taking serious efforts to improve air quality.

I would like to suggest that at our next meeting we elaborate a work-plan for 2012 fixing the most important outcomes and milestones as well as an operative agenda.

Best wishes

Oggetto: AIR: List of experts

Dear all,

09/10/2012

finally...we made it. ☺

Though I think – heard what was said at the political debate - there's a long way to go until we'll find a common position paper.

I started making a list of the experts from the regions with contact data.
Please fill in the data of your region and send it back to me.

Photos will come until 6pm...

regards

Dear all,

I count 10 participations for a **lunch meeting on Monday November 21st**. We would miss Steiermark, Baden-Württemberg and Veneto at the meeting. Would you be able to send a colleague? If we want to reschedule, it would be around Christmas. That would be rather late.

Any suggestions?

Kindest,

Oggetto: RE: Publish MoU

Dear all,

Also [REDACTED] would be present but Steiermark can not send a replacement. [REDACTED] proposed to send her input before or to meet for breakfast instead of lunch. Breakfast however is not on the 'menu' from which we can choose of the catering of Flemish government, so then we should change location and pay for it ourselves.

If you're all available for breakfast we could do that? If not we keep lunchtime.

What do you think?
Kindest,

Onderwerp: RE: Publish MoU

Dear all,

I count 10 participations for a lunch meeting on Monday November 21st. We would miss Steiermark, Baden-Württemberg and Veneto at the meeting. Would you be able to send a colleague? If we want to reschedule, it would be around Christmas. That would be rather late.

Any suggestions?
Kindest,

Van:

Verzonden: maandag 14 november 2011 15:52

Onderwerp: AW: Publish MoU

Yes, we should publish it.  could you put it on the web site?  where can we get the tape of our conference?

Best wishes

Steiermark office

Hi all,

Kulveer Ranger (London's political representative for Environment) has asked me to source all politicians' email addresses as he would like to contact them directly.

Could you please send me the email addresses?

Many thanks

I would be grateful if you could send me Mr Baumer's email address today. I am not sure you were copied in my previous email, but basically Kulveer Ranger (London's political representative for environment) would like to contact directly his European colleagues and has asked me to source the email addresses.

Many thanks

Dear [REDACTED]

please find attached the CV of my Ministerial Director Mr Bäumer.

Two little questions:

When will you send the CVs to Jackie Davies?

Are they going to be published or are they rather meant to inform JD about the participants?

Best regards,
[REDACTED]

Betreff: RE: MOU v 7 Sept 11.doc

Hi all,

As discussed, the list of things to get to JD are:

1. MoU
2. CVs (+photos)
3. a seating plan
4. (one or two) questions per region/politician
5. find date when regions' representatives will brief JD

[redacted]

London would like to see some of the issues below being addressed during the keynote speech:

1. limit values and health evidence
2. transboundary pollution
3. euro standards
4. abatement technology
5. tyre and brake wear

Hope this is useful.

Subject: RV: DOCUMENTS AIR (Air-

Dear [REDACTED]

As you probably know, the presentation from Greater London Office is still not available on the web site of the Air-quality Initiative of Regions. Will it be possible to send me directly the information.

London is a very good exemple for Barcelona and Catalonia so we will be very pleasant if you could send us the information.

Thank you very much
