Air Quality Statistics: 2012 (to date) Go

The table below shows whether pollution levels recorded at the site you have selected remained within the Government's Air Quality Strategy Objectives in 2012 (to date). For further basic statistics click on the button below, or for more precise statistics, use the [Statistics Calculator](#).

Pollutant	Objective	Was it achieved?	Value
Sulphur Dioxide	No. days 24hr mean >125ug/m3	YES	0
Sulphur Dioxide	No. hours hourly mean >350ug/m3	YES	0
Sulphur Dioxide	No. periods 15min mean >267ug/m3	YES	0
PM10 Particulate	Annual Mean (ug/m3)	YES	37
PM10 Particulate	No. days 24hr mean >50ug/m3	NO	44
PM10 (redundant method)	Annual Mean (ug/m3)	NO	42
PM10 (redundant method)	No. days 24hr mean >50ug/m3	NO	89
Ozone	No. days max rolling 8hr mean >100ug/m3	YES	0
Nitrogen Dioxide	Annual Mean (ug/m3)	NO	91
Nitrogen Dioxide	No. hours hourly mean >200ug/m3	NO	102
Carbon Monoxide	No. hours rolling 8hr mean >10mg/m3	YES	0

* Note that these results cover from the start of the year to now, and are still subject to change until the end of the year.

* Note - all results from TEOM PM10 analysers from 2004 onward are now converted to reference equivalence using the volatile correction method. Results using the old 'TEOM*1.3' method are also shown for comparison where relevant. [More information](#).
