Forecasting

These pages provide air pollution forecast information from Defra and the Devolved Administrations. Here you will find daily updated forecasts of UK air pollution concentrations for up to 24 hours ahead. Forecasts are issued for sixteen urban areas and sixteen UK regions; these cover roadside, urban background and rural locations.

Latest UK Air Pollution Forecast

Air pollution is expected to remain **Low** throughout the UK over the next two days, however ozone may reach **Moderate** levels in more rural areas of southern England. The situation is expected to improve from Monday as more unsettled and breezy weather is forecast.

Forecast valid until 9th September 2012

Forecasts are issued for sixteen urban areas and sixteen UK regions; these cover roadside, urban background and rural locations.

Latest UK Air Pollution Forecast

Air pollution is expected to be Moderate for ozone in rural south east England for the next 24 hours as a period of sunny warm weather affects the region. All other pollutants are to be **Low** for all other areas and locations within the UK.

The situation is expected to improve for the following 3 days.

Forecast valid until 10th September 2012
