

UK air quality forecast maps

These coloured contour maps show the five day forecast of the Daily Air Quality Index (DAQI) for the UK. The DAQI is a measure of the levels of daily average air pollution over the course of the day. Further information on how to interpret the forecasts and relevant health advice is provided on the Daily Air Quality Index page ([/guide/weather/air-quality](#)).

Our five day forecasts for UK locations now provide the DAQI at specific locations; the maps on this page show the variation over the whole of the UK. More information is available about air quality and an overview of how we produce the forecast ([/about-us/help/guides/air-quality-forecast](#)).

These maps are a trial product as part of our Olympic showcase and may not always be updated. Tell us what you think of this trial product via a quick questionnaire ([/invent/olympics-showcase-feedback](#)).
